Despite significant growth (677% CAGR in available supply of ad opportunities over three years) Yieldmo’s global marketplace did not see a corresponding growth in fraud.

Combining internal protocols and tools with actionable insights from HUMAN MediaGuard, Yieldmo proactively insulated Yieldmo from fraud.

Yieldmo’s invalid traffic (IVT) rate – already among the lowest in the industry at just 1% – declined 90% after implementing HUMAN MediaGuard to 0.1%.

HUMAN partnership instilled confidence for supply and demand partners in the ongoing quality of Yieldmo marketplace.

Located on AWS, Yieldmo’s bidding infrastructure allows HUMAN’s protection to respond with minimal network latency over the EC2 instance, allowing more time for a decision on a bid response.

**CHALLENGE:**
Grow Without Fraud

Spending on mobile advertising is expected to surge north of $61 billion a year. As one of the world’s largest independent ad marketplaces, Yieldmo saw this growth firsthand experiencing a 677% CAGR in its available supply of ad opportunities over the past three years. Yieldmo delivers success for advertisers and publishers with innovative ad formats and insightful data. Ensuring inventory quality and trust is no small feat with fraudsters constantly building on their toolsets false representation, automated browsing, and misleading interfaces to steal north of $2 billion of mobile ad spend.
To help fuel this growth, Yieldmo needed to ensure a fraud-free marketplace would continue for its advertisers and publishers. Implemented globally alongside proprietary tools, HUMAN’s Software as a Service MediaGuard provides value to customers by providing data on Request-to-Bid in programmatic advertising with little latency and delivered actionable insights to Yieldmo’s digital platform. Relying on a multilayered detection methodology that uses technical evidence, continuous adaptation, machine learning, and threat intelligence stored on AWS instances through Snowflake Databases, the HUMAN fraud mitigation platform verifies more than 20 trillion interactions per week, an unmatched scale that powers the most comprehensive pre-bid prevention and post-bid detection capabilities to make a decision in the last mile, as close to the customer as possible. HUMAN also leverages Route 53 for authoritative DNS service for all its domains.

Yieldmo quickly scaled its platform with confidence due to the protections it had in place. Combining internal protocols with HUMAN MediaGuard proactively insulated Yieldmo from fraudulent activity on its platform. Yieldmo’s invalid traffic (IVT) rate - already among the industry’s lowest at just 1% - declined 90% after implementing HUMAN MediaGuard to 0.1%. Laying the foundation of protection, actively monitoring all sources, and adjusting as required, Yieldmo and HUMAN delivered trust in the marketplace for all partners.

“Fighting fraud requires more than simple measurement. HUMAN’s focused and unique approach and the reporting of IVT is a major reason we originally started our partnership.”

Shawn Yang, Managing Director, Yieldmo

RESULTS:
Proactive Protection Delivers Clean Growth

Yieldmo’s invalid traffic (IVT) rate - already among the industry’s lowest at just 1% - declined 90% after implementing HUMAN MediaGuard to 0.1%. Laying the foundation of protection, actively monitoring all sources, and adjusting as required, Yieldmo and HUMAN delivered trust in the marketplace for all partners.
